Copyright Notice

Copyright protects the contents and layout of the Connoisseur Catalogue. Permission is hereby given for material in this catalogue to be used privately by philatelists in describing and writing up their collections. It is also extended to be quoted editorially in magazines and philatelic society publications, also by stamp dealers in advertisements and price lists, provided that acknowledgement of the source is given. Where catalogue numbers are quoted, they must be used in full and unadapted and the source must be acknowledged in the advertisement or list.

Publishers of books, catalogues, albums and all other publications, must obtain written consent to quotation or reproduction of parts of this work in any form or by any means, electronic, mechanical or otherwise from B.Alan (Stamps) Ltd. (*2 Pinewood Avenue, Sevenoaks, Kent, TN14 5AF, UK*) in all other instances. This copyright covers all diagrams used in this work. The copyright for stamp images, panes and parts thereof is vested in The Post Office and remains their property at all times.

Acknowledgments

The publishers are most grateful to Douglas G. A. Myall (2 Elizabeth Avenue, Bridport, Dorset, DT6 5BA) for his help and continued agreement of the use of his Deegam system copyright material for: (a) the Machin Head Type designations; (b) cross-references to his Type numbers in descriptions of value settings; (c) the S series for coding of short phosphor bands, the I series for inset bands and the N series for notched bands; and (d) the universal coding system for sheet and cylinder block perforation types.

We also acknowledge the use, with permission, of copyright material of the Modern British Philatelic Circle (Membership Secretary – A.J. Wilkins, 3 Buttermere Close, Brierley Hill, West Midlands, DY5 3SD) covering: (a) the DB system for numbering decimal stamp booklets with the exception of ‘window’ stamp booklets; (b) the DP & SP numbering systems for all decimal booklet panes; (c) the perforation coding system for decimal booklet panes; and (d) the Type numbering system for ‘window’ stamp booklets.

SECTION 10B

Country Emblem Definitives

In the spirit of devolution present towards the end of the 1990's, Royal Mail decided that time had come to bring an end to the Regional series. Replacements were required that reflected the character of the newly devolved Scottish and Welsh nations, but without being too stereotypical or picture book. As a consequence a semi-pictorial emblematic style was adopted, in full colour, allowing more scope for adventurous design than had been possible with the mono-colour Machins.

Scotland held a TV poll for subject matter, from which designs were developed by leading Scottish designers, under the auspices of Edinburgh graphics house Tayburn. The population of Wales were not quite so blessed, having the subject matter for their stamps chosen for them by Welsh firm Tutsells. These stamps used local craftsmen to create emblems in traditional Welsh materials. The stamps were issued in June 1999, to coincide with the inauguration of the Scottish Parliament and Welsh Assembly. The stamps remain in the traditional size used for GB low values definitives since 1840.

Although Northern Ireland continued to use standard regionals for almost two further years due to the fragile nature of the peace agreement in the province, emblem definitives in a similar style were issued in March 2001. They feature iconic images of Northern Ireland based on semi-abstract photographs and were designed by Belfast based design firm Rodney Miller Associates. Just a month later, England followed suit. Ever since the release of the first regionals in 1958 there had been calls from those of a nationalist bent for England to have their own series and at last Royal Mail bowed to their wishes. The English set featured four heraldic style images in plaster relief, similar in many ways to the bust created by Arnold Machin. They were designed by Sedley place, using images sculpted by David Dathan.

Initially, all bar the overseas rate value were NVI's – 2nd, 1st and "E" – so the changes at a tariff revision would only require reprinting of one stamp. However the "E" NVI was replaced in 2004 by the then current corresponding European rate value, 40p. Since then, the two denominated values are replaced at every tariff change.

Colours Used In Printing. We list the colours used to print Emblem regionals at the beginning of the notes for each country in the Full Bleed section. The make up of these colours varies slightly dependent upon printer and process over the period that these stamps have been in use, in an attempt to maintain consistency. We do not attempt to detail every slight variation herewith.

Value order. As the two or three lowest values of each series is an NVI, these are listed first, followed by denominated issues in order of ascending value.

(i) Full Bleed Designs

In a break from traditional definitive designs, initial issues from all four regions show a design that is full bleed – that is it runs right to the very edge of the stamp – to give a more modern appearance.

Vignetted bands. Country Emblem definitives all have relatively dark backgrounds to their stamps, which made it necessary for wider than normal phosphor bands to achieve an adequate phosphor response to activate automatic sorting equipment. As a consequence, on two band stamps the phosphor encroaches over a large part of the design. In an attempt to make the edge of the phosphor bands less apparent, on all Walsall and most De La Rue printings the bands are “vignetted”. The effect is that under UV they appear weaker the nearer to their inner edge as if being faded into the background. This makes the measurement of phosphor width difficult. As a consequence, the measurements given for the bands should only be considered approximate.

(A) Scotland

Saltire
Anton Morris
(painting)

Lion
Frank Pottinger
(sculpture)

Thistle
Tim Chalk
(sculpture)

Tartan
Kinloch Andersen
of Leith
(material)

The designs were based on materials originated by the artists listed beneath each illustration above. The medium used is given in brackets. The lion, thistle and tartan designs were photographed by Julyan Rawlings for reproduction on the printed stamps.

Colours used in printing:

Saltire	Bright blue; deep bright blue; silver (Queen's head)
Lion	Yellow; scarlet; carmine; silver (Queen's head)
Thistle	Pale violet; deep violet; silver (Queen's head)
Tartan	Cyan; magenta; yellow; black; silver (Queen's head)

* The silver printing on stamps from warrant 608 can be clearly seen through the phosphor when held parallel to the light. On stamps from earlier warrants, the head and value is difficult if not impossible to see through the phosphor. It is possible this is the result of the silver being printed on top of the phosphor rather under it, as normal.
