

Connoisseur Catalogue

Online Edition ©2008

10th Edition Pages

The pages in this chapter are basically those from the 10th edition of the Connoisseur Catalogue with some price adjustments for those items most noticeably out of date and the inclusion of new finds since the 10th edition was originally published. A full revision of these pages will take place in due course, with significant updating of listings, prices and the addition of colour illustrations. We will notify registered catalogue users of the new edition pages when available.

Copyright Notice

Copyright protects the contents and layout of the Connoisseur Catalogue. Permission is hereby given for material in this catalogue to be used privately by philatelists in describing and writing up their collections. It is also extended to be quoted editorially in magazines and philatelic society publications, also by stamp dealers in advertisements and price lists, provided that acknowledgement of the source is given. Where catalogue numbers are quoted, they must be used in full and unadapted and the source must be acknowledged in the advertisement or list.

Publishers of books, catalogues, albums and all other publications, must obtain written consent to quotation or reproduction of parts of this work in any form or by any means, electronic, mechanical or otherwise from B.Alan (Stamps) Ltd. (*2 Pinewood Avenue, Sevenoaks, Kent, TN14 5AF, UK*) in all other instances. This copyright covers all diagrams used in this work. The copyright for stamp images, panes and parts thereof is vested in The Post Office and remains their property at all times.

Acknowledgments

The publishers are most grateful to Douglas G. A. Myall (2 Elizabeth Avenue, Bridport, Dorset, DT6 5BA) for his help and continued agreement of the use of his Deegam system copyright material for: (a) the Machin Head Type designations; (b) cross-references to his Type numbers in descriptions of value settings; (c) the S series for coding of short phosphor bands, the I series for inset bands and the N series for notched bands; and (d) the universal coding system for sheet and cylinder block perforation types.

We also acknowledge the use, with permission, of copyright material of the Modern British Philatelic Circle (Membership Secretary – A.J. Wilkins, 3 Buttermere Close, Brierley Hill, West Midlands, DY5 3SD) covering: (a) the DB system for numbering decimal stamp booklets with the exception of ‘window’ stamp booklets; (b) the DP & SP numbering systems for all decimal booklet panes; (c) the perforation coding system for decimal booklet panes; and (d) the Type numbering system for ‘window’ stamp booklets.

SECTION 3

Decimal Stamps with Redrawn Numerals

For some time both Post Office and printers were aware that the value tablet had lost its uniformity both in design and position; whilst giving great pleasure to philatelists, enabling them to place and identify printings by value, type and position, it did not correspond to the Post Office's ideas of quality control. At a P.O. meeting early in 1982, it was felt that the previous arrangement of leaving it to the printing technicians to select the particular value tablet required, and even leaving to the same technicians the actual positioning of the value, had resulted in an unacceptable hotchpotch. Added to this were the problems that arose from the ever-increasing size of the denominations, both physical and numerical.

When inflation called for such values as the 20½p, a narrower set of numerals with less spread was required and Jeffery Matthews, the artist often used by the British Post Office, was employed to design the completely new set of denominations. Each value is designed as a whole in the sleeker and more modern style now in use: for ease of reference we illustrate the numerals separately. Matthews also positions the values on a grid based on the bottom corner of the stamp design, so that in theory different settings should no longer occur.

Redrawn numerals first appeared in the issues of 30 March 1983; phasing out the old style was progressively completed by 1988.

Along with redesigned numerals the Post Office have been systematically improving other aspects of design. In 1988 they began switching to the stronger “Jeffery Matthews” colours, for which he has designed a total of 30. In using them the P.O. have progressively phased out light and graded backgrounds, current style being light heads on dark backgrounds. First seen with the Harrison 5p of 26 July 1988, the change-over was completed with the issue of the 10p orange of 4 September 1990.

Screening dots over the value tablet reappeared in 1986 with the sheet stamps 12p FCP (CC RF120) and 34p ACP (CC RA340). From mid-1987 other values have been found with screened values and these are listed with suffix SCR.

Harrison printings. Photo. Perf 15 x 14.
